ABOUT US

BRIEF HISTORY

Core Atlas is an emerging player in the oil and gas sector, focused on the procurement and supply of specialized pipeline components, fluid control equipment, metering and sensor systems, pipeline security solutions, and industrial chemicals. We partner with trusted manufacturers to deliver high-quality, compliant products that support safe, efficient, and modern pipeline operations.

Originally established as a supplier of general oil and gas equipment, Core Atlas has evolved in response to industry needs. Our current focus reflects a strategic shift toward more technical and infrastructure-critical areas of the energy supply chain.

Our aim is to deliver reliable, cost-effective solutions that enhance operational efficiency, safety, and environmental compliance in the energy sector. With a commitment to quality and performance, Core Atlas is positioned to be a trusted partner in the evolving oil and gas industry

OUR Vision

To become a trusted leader in the oil and gas industry by offering innovative solutions in procurement and integrity management.

At Core Atlas Ltd., our mission is to empower energy sector enterprises with state-of-the-art solutions that drive operational excellence and sustainable growth.

We are committed to delivering innovative products and services through robust procurement processes, cutting-edge remediation techniques, and comprehensive support solutions—all while upholding the highest standards of safety and environmental responsibility.

OUR CORE VALUES

Integrity

- ▶ Commitment to ethical business practices and transparency.

Quality

- ▶ Delivering premium products and services that meet industry standards.

Innovation

- ▶ Implementing cutting-edge solutions for efficiency and reliability.

Safety

- ▶ Prioritizing safety in all our operations.

Sustainability:

- ▶ Ensuring environmentally responsible operations.

BUSINESS ACTIVITY

Core Atlas is a growing procurement partner in the oil and gas industry, specializing in high-performance equipment and chemical solutions. We support upstream, midstream, and downstream operations with a focus on four key areas:

1. DRILLING AND PRODUCTION ACCESSORIES

(Pipeline Components and Fluid Control Equipment)

We supply reliable, field-ready components that ensure safe and efficient production:

- **Gaskets & O-Rings** - For critical sealing applications across high-pressure systems.
- **Valves & Actuators** - Manual and automated solutions for flow control in pipelines and processing units.
- **Seals & Couplings** - Engineered for durability in drilling and production environments.
- **Fittings & Flanges** - Precision parts for pipeline assembly and system integration.

2. ASSET INTEGRITY AND FIELD SECURITY

We help protect infrastructure and personnel through advanced safety and monitoring tools:

- **Pipeline Monitoring Devices** - Real-time detection of pressure drops, leaks, and system anomalies.
- **Explosion-Proof Cameras & Sensors** - For surveillance and safety in high-risk zones.

- **Integrity Testing Tools** - Equipment for non-destructive testing (NDT), corrosion tracking, and material verification.

3. **PROCESS AUTOMATION AND METERING**

Instrumentation and control systems that optimize operations and improve visibility:

- **Flowmeters** - Accurate flow measurement for oil, gas, and injected chemicals.
- **Pressure & Temperature Sensors** - For critical process control and early fault detection.
- **Gas & Liquid Analyzers** - Ensure quality, compliance, and process optimization.
- **Control Panels & SCADA Interfaces** - Support automation and real-time system feedback.

4. **Specialty Oilfield Chemicals**

We supply high-grade chemicals to support production efficiency, asset protection, and environmental compliance:

- **Corrosion & Scale Inhibitors** - Extend equipment life and maintain flow assurance.
- **Demulsifiers** - Improve oil-water separation at the production stage.
- **Biocides** - Prevent bacterial contamination and microbiologically influenced corrosion (MIC).
- **Degreasers & Solvents** - Industrial cleaning solutions for safe equipment maintenance.

OUR FUTURE

EXPANSION PLANS

01

ASSET PROTECTION

Safeguarding industrial assets against corrosion and damage.

02

SANDBLASTING

Surface treatment for industrial equipment and pipelines.

03

NON-DSTRUCTIVE TESTING (NDT)

Inspection services to assess material integrity without causing damage.

04

MATERIAL INTEGRITY TESTING

Ensuring the durability and performance of industrial materials.

05

REMEDIATION SERVICES

Oil and Gas Remediation, Oil Well Remediation
